## Biography

Doctor is an irreverent and bold artist, erratic and raw, hailing from the deep outskirts of Buenos Aires, specifically from La Matanza.

He became known on the streets at the age of 12 for his Vandal graffiti on walls, subways, and metros, embodying the street value that comes with it.

He was also known for being the one to do beatboxing during long freestyle sessions and excesses with older rappers, who could appreciate the uniqueness of his style, which fluctuated between punk, hardcore, cumbia villera, rap, and his 100% TRAP lifestyle. A child who stood out in rap battles with his unparalleled style.

Doctor began bringing TRAP to underground hip hop events during a time when it had yet to gain the acceptance it holds today, defending TRAP as an inevitable evolution of his lifestyle
